

# DIABETIC MEDICATION NON INSULIN

## **STOP 3 DAYS BEFORE ADMISSION**

### Sodium glucose co-transporter 2 inhibitors (SGLT2i)

- Canagliflozin (Ivokana)
- Dapagliflozin (Forxiga)
- Empagliflozin (Jardiance)
- Ertugliflozin (Steglatro, Segluromet, Steglujan)
- Empagliflozin + linagliptin (Glyxambi)
- Empagliflozin + metformin (Jardiamet)
- Dapagliflozin + saxagliptin (Qtern)
- Dapagliflozin + metformin (xigduo)

## **STOP DAY BEFORE ADMISSION**

### Biguanides

- Metformin XR (slow release) (Glucophage SR)
- Gliclazide MR (slow release) (Diamicon MR)
- Glibenclamide
- Tolbutamide
- Glimepiride (Amaryl)

### Sulphonylureas

## **STOP DAY OF ADMISSION**

### Biguanides

- Metformin (Glucophage)
- Metformin XR (slow release) (Glucophage SR) Usual dose at
- Linagliptin (Trajenta)
- Saxagliptin (Onglyza)
- Sitagliptin (Januvia)
- Vildagliptin (Galvus)

### Sulphonylureas

- Glipizide (Minodiab)
- Gliclazide (Diamicon)
- Gliclazide MR (slow release) (Diamicon MR)
- Glibenclamide
- Tolbutamide
- Glimepiride (Amaryl)

### Alpha-glucosidase inhibitor

- Acarbose (Glucobay)

### Thiazolidinediones

- Pioglitazone (Actos)
- Rosiglitazone

### Dipeptidyl Peptidase-4 inhibitors (DDP-4i)

- Alogliptin (Nesina)

### Combination products

- Rosiglitazone/metformin (Avandamet)
- Vildagliptin/metformin (Galvumet, Eucreas)
- Glibenclamide/metformin (Glucovance)
- Sitagliptin/metformin (Janumet)
- Saxagliptin + metformin (Kombiglyze)
- Linagliptin + metformin (Trajentamet)
- Alogliptin + metformin (Nesina Met)

### Incretin (GLP-1) mimetic agent

- Exenatide (Byetta)
- Liraglutide (Victoza)
- Dulaglutide (Trulicity)
- Exenatide 2mg weekly (Bydureon)

# DIABETIC MEDICATION INSULIN

## EVENING BEFORE ADMISSION

Give half dose evening prior to surgery. Must have a nighttime snack prior to midnight

### Long-acting (analogues)

- Lantus
- Toujeo
- Levemir

## DAY OF ADMISSION FOR MORNING PROCEDURE

Give half dose morning prior to admission.

### Long-acting (analogues)

- Lantus
- Toujeo
- Levemir

### NO MORNING INSULIN

#### Ultra-short acting (analogues)

- Apidra
- Humalog
- Novorapid

#### Short acting (regular)

- Actrapid
- HumulinR
- Hypurin Neutral
- Protophane

#### Intermediate acting (mixed)

- Humalog Mix 25,  
Mix 50
- Humulin 30/70
- Mixtard 30/70,  
**50/50**
- NovoMix 30
- Ryzodeg

## DAY OF ADMISSION FOR AFTERNOON PROCEDURE

Half usual insulin dose with breakfast (prior to 7am) Fast after light breakfast/clear fluids

#### Long-acting (analogues)

- Lantus
- Toujeo
- Levemir

#### Ultra-short acting (analogues)

- Apidra
- Humalog
- Novorapid

#### Short acting (regular)

- Actrapid
- HumulinR
- Hypurin Neutral
- Protophane

#### Intermediate acting (mixed)

- Humalog Mix 25,  
Mix 50
- Humulin 30/70
- Mixtard 30/70,  
**50/50**
- NovoMix 30
- Ryzodeg
